Chevron State of Rhode Island (Chariho Regional School District)

SUMMARY

ADI Energy helped Chevron Energy Solutions develop two of the first energy performance contracts under the state of Rhode Island Energy Performance Contracting Program. ADI developed the design/build team for the project and completed the necessary preliminary design and economic analysis for the State to award the contract to Chevron.

Overall value: \$1.4 million

SERVICES

- Energy audit development and analysis
- Energy savings analysis
- Conceptual Design
- Preparing/analyzing energy savings M&V reports
- Energy Trending
- Energy modeling
- Commercial energy services
- Conservation services
- Preliminary assessment for energy
- ESPC design build

MEASURES

- Electric heat to Oil-fired
- Hydronic heat

UNIQUE VALUE TO CUSTOMER

The State of Rhode Island had a terrible situation on its hands. In less than four (4) months the Chariho Vocational School was going to need heat because the current system was no longer effective. The Chariho school department personnel were relying on portable electric heaters in the classrooms as well as requesting some students to wear coats to class.

ADI Energy completed the conceptual design of a new heating system and developed a solution with Chariho to install a new heating system throughout the building. The work was completed in less than five months with better than expected performance.
