The Union Club of Boston, MA

SUMMARY

ADI Energy prepared a scoping energy audit for the Union Club of Boston, MA. This energy study was commissioned in order to identify cost-effective energy conservation measures (ECMs) that would save the energy and reduce the Union Club's Carbon Foot Print without sacrificing occupant comfort.

Energy Conservation Massachusetts
Energy Efficiency Massachusetts

Size: 1 building

SERVICES

- Energy audit
- Energy savings analysis
- Benchmarking
- ECM recommendations
- Energy profiling
- State utility incentive program recommendations
- Energy conservation
- Utility reductions

MEASURES

- Solar PV and Solar Thermal
- Lighting
- Variable Frequency Drives
- Retro-commissioning
- Boiler Retrofits
- Indoor Air Quality
- Kitchen Equipment Replacement
- Steam Decentralization
- Energy Management System (EMS)

UNIQUE VALUE TO CUSTOMER

This energy study was commissioned in order to identify cost-effective energy conservation measures (ECM's) that would save the energy and reduce the Union Club of Boston's Carbon Foot Print without sacrificing occupant comfort.

Not only did ADI Energy provide recommendations of various ECMs that would yield substantial energy savings to the Union Club of Boston, but also presented recommendations to optimize the operational efficiency of the building's systems. ADI Energy also presented the Union Club of Boston with different utility purchasing savings programs and clean energy programs.
